

Team 5 - Sprint 1 review report

(Sergei Vilka, Mahnoor Fatima, Trung Vu)

What has been done:

- We created Trello and populated it with Product Backlog & Sprint Backlogs
- We divided tasks between 4 Sprints and assigned the tasks of the first sprint to the team members. We also set the deadlines
- We wrote Project Plan and Product Vision. Both documents were submitted in Moodle
- We have developed an UI Blueprint for the application in Figma
- Project repository and Version control was set up

What is in progress:

- We are finalising the AI presentation (Human-AI Collaboration in Software Development: Changing Roles and Skill Requirements), it will be submitted later today
- Set up Jenkins and Docker (once we get the instructions)
- Development of frontend and backend of the app, and implementation of the core features (will be done in Sprint 2)

Obstacles we faced:

- One team member was not able to join the course, we have to work in a team of 3 instead of 4
- Another team member joined the work with a small delay
